

NWEA® MAP Growth Skill Plan

Let IXL take some of the work out of your test prep. Our interactive skill plans for the NWEA® MAP Growth assessment guide students directly to the skills they need for success.

Available for grades K-2, 2-5, and 6+, our interactive skill plans include skills for all of the topics and courses covered on the exam.

Each skill plan provides leveled support for students by recommending IXL skills in each instructional area based on their RIT score.

By aligning IXL skills to small RIT score ranges, we can target individual student needs more precisely.

Simply choose an instructional area and have students complete the recommended skills for their score. Teachers can even assign specific skills as needed.

Monitor student progress by clicking on the bar graph in your skill plan or drill down using the Students Quickview report in the Analytics tab.
